

SEI Paint Proofer adds 100% water repellency characteristics to any latex paint or stain.

This product also conditions the paint for easier application and greatly improves the fade resistance properties. This water-based micro-emulsion additive increases the life,

value and performance of all latex paints and stains.

The SEI Paint Proofer is FREE! The SEI Paint Proofer costs the same as latex paints. When you add the SEI Paint Proofer at 4 parts paint to 1 part Paint Proofer you end up with a total volume of 5 parts of water repellent paint.

Use On:

- All new and remedial construction
- Use in commercial, industrial and residential environments
- New and used brick
- Poured-in-place concrete
- Concrete block
- Precast concrete
- Stucco
- Plaster
- Wood
- Lap siding
- Previously painted surfaces
- Drywall
- Plywood
- Masonite and composite panels

Advantages:

- Provides 100% water repellency
- Prevents mold and mildew problems by keeping paint film dry
- Is compatible with all latex paints and stains
- Prevents moisture intrusion, freeze-thaw and weather extremes
- Extends substrate life by keeping underlying surfaces dry
- Prevents color fading and water spotting
- A Paint Proofer film is self cleaning, keeping surfaces looking like new

Application Advantages:

- Improves flow and leveling qualities
- Longer wet-edge reduces lap marks
- Minimizes brush marks, roller drag and spray tip plugging
- VOC and AQMD compliant
- Complies with all known National Air Pollution Standards
- Paint Proofer will not change the color or hiding power of paints or stains
